### Software and skills

---

#### Frontend Development

HTML5

Vanilla Javascript / DOM / ES6 / Typescript

CSS3 / SASS / Bootstrap / Tailwind Css

React / Vue / Nuxt

#### Backend Development

PHP

Java / Spring Boot / Maven

REST APIs

Programming Languages

PHP / Java / C++ / C# / Python

CMS

Wordpress / Woocommerce

Shopify

Storyblok

Firebase / Strapi

Databases

Mysql / Sql / Postgresql

Cloud services

Amazon AWS

Loopia / Filezilla / Heroku / Netlify

Project Management Tools

Agile method / Scrum / Kanban

Trello / Miro

Teams / Skype

UI/UX Design Tools

Adobe XD / Figma

GIMP

Unit Testing

Junit 5

DevOps

Git / Github / Bitbucket

Docker

Linux

Oracle VM Virtualbox

Vagrant

Jenkins

Other Tools

Stripe

SEO

PWA Studio

Google Tag Manager/ Google Analytics

### Languages

---

Svenska – Good

English – Fluent

### Reference

---

Available on request

### Experience

---

#### Fullstack web developer (.Net/React/Azure)

**Salt** | Feb 2023 – On going.

- After completing 3 months intensive full stack web developer course from salt, I started working as .Net developer.

#### Frontend web developer

**Ecombooster – Jobbsprånget (PRAKTIK)** | Sep 2023 – Dec 2023

- Worked as a **Frontend developer** to create ecombooster websites and working on functions to enable customers to do more of the onboarding flow on their own (configuration) instead of it requiring adaptations created by the team by using modern technology and frameworks like React, TypeScript, Material UI and Redux.

#### Software developer

**Novare Potential** | Dec 2022 – April 2023

Worked as software developer consultant on different type of projects. The main technologies were.

- Frontend:** Typescript and React, Rest Apis
- Backend:** Java 11+, Springboot, and Microservices, Maven.
- Testing:** Junit testing, React testing Library and Jest.
- Version control:** Github.
- Cloud/Devops/Container:** Docker, AWS, Linux, Bash scripting.
- Telecom industry:** Basic leve of understanding in telecom (IPV4, IPV6 etc).

#### Fullstack Web developer

**Nordic Web Team** | NOV 2021 – MAY 2022

- Created a **PWA Studio extension** for magento2 frontend and have successfully integrated PWA studio with google tag manager and google analytics to enhance e-commerce. It also includes creating npm packages, connecting frontend with magento backend by using GraphQL and creating a small online shop in magento 2.
- Worked as a **frontend developer** with new technologies and frameworks like vue.js, nuxt.js, tailwind css and storyblok as headless cms and created a multi-language website for the company.  
Company website link:  
<https://nordicwebteam.com/>

#### Fullstack Web developer

**Yaylo** | OCT 2021 – NOV 2021

- Working on **automation and testing** in cypress
- AWS alarms**
- Learning **python**, python testing and flask.

## Experience

---

### Frontend developer and UI/UX designer

**FREJAC** | JULY 2021 – AUGUST 2021

Worked as a **developer** and customising and editing existing shopify website frontend, creating custom schema and section.

### Electrical Engineer

**KRL Foundation - RPD (Reverse Engineering and Product Development) - Pakistan** | 2012-2012

Learn soldering, making of pcb layout, components assembling on silicon made pcb and 8051 architecture microcontroller assembly language programming (Proteus as simulator).

### Electrical Engineer

**Smart PCB Pakistan** | 2012-2012

- Learn pcb routing on Proteus (Ares) simulator (editing, removing, and adjusting connections between components)
- Worked as a **programmer** in C# CRUD project related to employee's record.

## Education

---

### Fullstack Java development bootcamp

**Novare Potentiel** | MAY 2022 - Dec 2022

As a full stack web developer student with Java as a backend language I have worked on different projects and have hands-on experience of frontend development using react, typescript, rest apis and have worked on spring boot and postgresql for backend development.

### AWS short course

**CAMPUS MÖLNDAL** | OCT 2021 - DEC 2021

I have studied an AWS course on distance and have knowledge about basic Linux commands, Amazon AWS, CI/CD pipeline and internet security related to AWS.

### Full stack web development in e-commerce

**MEDIEINSTITUTET** | SEP 2020 - MAY 2022

I have studied full stack web development courses specially in e-commerce and have knowledge about front end development and responsive designing, php, mysql, react, agile management system including kanban and scrum, seo (Search engine optimization), system integration with 3rd party system including firebase, stripe and strapi, heroku deployment, wordpress and woocommerce.

### Front end development

**CHANGEMAKER EDUCATIONS** | JUNE 2020 – NOV 2020

Studied front-end development and have good hands-on knowledge about Html, Css, Sass, Javascript, React and API.

### Gränssnittsdesign/UI Design

**NTI SKOLAN** | JUNE 2020 – SEP 2020

I have studied user interface design and created a website prototype by using Adobe XD software.

### Java programming 1 & 2

**JENSEN KOMVUX** | MARCH 2020 – NOV 2020

I have studied object-oriented programming in Java and have created a game "Spel 21" for my final project.

## Education

---

**SFI 3d - Svenska som andraspråk grund, 1 & 2**

**NTI SKOLAN** | 2019 – JUNE 2020

Studied Swedish language including sfi (3D), SAS grund (2, 3 and 4) and SAS 1 and 2 online and can communicate, read, and write in Swedish

**SFI 3C**

**HERMODS SKOLAN** | 2015 – 2016

Studied Swedish language course sfi 3C.

### Bachelor in electrical computer engineering

**COMSATS PAKISTAN** | SEP 2010 – JULY 2014

I had studied 4-year bachelors' course related to computer hardware and software, communication system, programming language (C++) including object-oriented programming, algorithm and data structure and web development.
